

Digital technology for sustainable development

15 and 18 October 2024

At 9.00.

Webinar

Fee per participant:

Micro, small and medium-sized enterprises: free of charge,

Large companies: 1500 €.

In an active and experiential way, we will come to understand circular business models and the potential they offer. Through practical examples we will analyse where the opportunities and risks lie. The focus will be on cultivating a mindset that fosters innovation and business success. The role of digital technologies as enablers of innovative business models and user experiences will be put in the context of sustainable development. Participants will gain knowledge and ideas on how to improve their competitiveness while introducing new digital solutions for better long-term business success and a positive impact on the environment and society.

Content:

Four groups of Industry 4.0 digital technologies that support and enable sustainable development (and circularity) will be presented:

- Data, which provide the engine for the digital economy.
- Connectivity, which provides the data flow, feedback loops and drive for the 1st group.
- Trust, which refers to transparency, visibility and accountability in business.
- Enhancement of asset management: sensors, smart analytics, monitoring of physical and biological areas, resource efficiency, waste and pollution reduction.

Technologies to be presented under the above groups with examples of practical applications: Big Data, Data Analytics, AI (Artificial Intelligence), CPS (Cyberphysical systems), IoT, Intelligent assets, Blockchain, Extended reality (AR, VR and MR), Digital twins, Virtualisation, Robotics.

The training is for:

✓ directors,

✓ corporate decision makers,

✓ heads of product development and business development departments; and

✓ anyone else interested in this subject.

Lecturer:

Valeria Radosavljević: Director of Ecolibrium, a company offering consultancy in the field of circularity and sustainability. Experienced lecturer and workshop leader, among others for OZS, MPIKov AS and KOCles. She cooperates with many companies and organisations in Slovenia and abroad.

Registration fee:

The price covers participation in the event, materials and certificates. Certificates will be issued upon request.
