

A guide to the introduction of artificial intelligence in small and medium-sized enterprises in Slovenia

In March 2023, as part of the AI4SI project, the Association for Informatics and Telecommunications (at the GZS) published an electronic guide to the introduction of artificial intelligence in small and medium-sized enterprises in Slovenia.

As a manager, entrepreneur or owner who wants to prepare his company for an economic environment based on artificial intelligence (AI), today in society we are faced with conflicting information regarding the dangers and benefits of AI. Managers of organizations and projects are faced with technical requirements and strategic dilemmas regarding the use of AI in the operation and business of organizations. In this guide, the authors present thoughtful steps to get you started with implementing AI in your business or organizations. Experts from companies and knowledge institutions who join AI4SI (AI for Slovenia) strive to ensure that you enter the path of introducing artificial intelligence safely, reliably and with guaranteed results.

The Association for Informatics and Telecommunications (ZIT) is a representative association of the ICT sector in Slovenia, which supports the interests of its sector and the expectations of its members and is an active member of the supporting environment for the successful digital transformation of the Slovenian economy and society. Slovenia is internationally recognized in the field of research and development in the field of artificial intelligence. It is noticeable, however, that its introduction into business processes, both in the economy and in the state administration, is still not taking place. The initiative AI4SI (AI for Slovenia) was founded precisely for the purpose of faster transfer of artificial intelligence into practice.
