

2nd Slovenian Quantum Computing Forum

The **2nd Slovenian Quantum Computing Forum: From Research Achievements to Slovenia's Own Quantum Capabilities** will take place in Novo mesto on 5 November 2026.

The forum will focus on current research achievements in quantum computing and their potential applications. Topics will include quantum optimisation and hybrid solvers, the establishment of quantum computing infrastructure, the development of Slovenia's first quantum computer, and the testing and standardisation of quantum technologies.

European and Slovenian strategic priorities in quantum technologies will also be presented. The programme includes lectures by researchers and experts from Slovenia and abroad.

The event will take place on 5 November 2026, from 9:00 to 14:15, at Rudolfovo, Podbreznik 15, Novo mesto. It is organised in cooperation with Qutes and is being held as part of Science Month and in conjunction with World Science Day for Peace and Development.

Participation is free of charge, but advance [online registration >](#) is required due to limited capacity. For additional information, please contact katja.sinur@rudolfovo.eu.
