The event is organised by the Section for Human Resources Management.

We will focus on the key issues that all HR professionals need to consider. Do we know today what the future of the labour market will really look like? We will discuss the current state of the labour market and reveal what we can expect in the future. We will pay special attention to the impact of artificial intelligence, including Chat GPT, and why it will not leave us out of work. At the same time, we will explore the role of HR professionals today and how this role will shape the future. All this and who will (re)remain employable in a cooling economy. The professional day will continue with an interactive workshop based on the question; Artificial Intelligence - a tool or another executioner of HRM? After the professional part of the day, the award ceremony will take place to present the Exemplary Case of Human Resources Management Award of the Chamber of Commerce of Dolenjska and Bela Krajina for 2022.

You are cordially invited!
