

## 2nd meeting of the executive committee of the Section for Innovation at TPV AUTOMOTIVE

Section for Innovation (SINO) held an executive committee meeting at TPV AUTOMOTIVE d.o.o. this time. The committee members reviewed the results of innovations at the national level, prepared the basis for evaluating innovations in the region for the coming year, and discussed proposals for the section's future work.

GZDBK provides business practice visits and knowledge exchange to its members, so the continuation of this meeting included a presentation of the TPV AUTOMOTIVE company and a tour of its production facilities. The company is a developmental supplier in the automotive industry, and within its programs, it develops and manufactures products that have a significant impact on driving dynamics, safety, environmental sustainability, and driving comfort while introducing new technological solutions in the field of electric vehicles (EV). They leverage their over 60 years of experience in the automotive industry for optimizing the development and production of extremely durable components for agricultural, construction, and other industrial machinery. Leading manufacturers with their brand names, such as BMW, Claas, Jaguar, Mini, Mercedes Benz, Renault, Rimac, Rolls Royce, Land Rover, and Volvo, trust the company with product development.

Membership in the Innovation Section ([SINO](#)) is free for all employees of companies that are members of GZDBK.
