

Visit to the company L-Tek

GZDBK organizes numerous forums, visits, and exchanges of good business practices among companies, entrepreneurs, and other working organizations. The executive committees of each professional section at the regional chamber formulate their own annual operational programs, and as part of this program, each professional section is responsible for exchanging good business practices through visits. This time, the [Section for Informatics \(SI\)](#) has planned a visit to [L-Tek](#)[®].

L-Tek is a development-oriented company that designs and manufactures complex high-tech electronic products in small and large series (EMS – Electronic Manufacturing Services) across various industries, including IoT, medical technology, and measurement technology.

L-Tek's commitment to development is evidenced not only by its business success but also by its [innovation awards](#). The owner and management recognize that the success of the company is strengthened and ensured by all employees, which is why the company's care for its staff is of a high standard and strategically planned. For its management of employees, the company received the prestigious award from [the Chamber of Commerce of Dolenjska and Bela Krajina in October 2020 for Exemplary Management of Human Resources](#). The company has also been carefully and diligently engaged with the environment in which it operates since 2005.

The hosts, Boris Rebselj, a member of the executive board of the Section for Informatics, and Matej Slapšak, the director of L-Tek, presented the company and its development.

Subsequently, attendees were informed about their digital practices, maintenance, and assurance of digitalization systems and cybersecurity, which we also promote at GZDBK through the [SRC-EDIH](#) project. This was followed by a tour of the company. The visit concluded with an exchange of opinions, insights, and experiences over refreshments.

We invite you to view the photo highlights from this meeting.

Membership in the Section for Informatics (SI) is free for all employees of companies that are members of GZDBK.

[Join the SI section >](#)

The event is part of the [SRC-EDIH](#) project.
