

Accounting breakfast: digitisation and automation of reports and reporting

On 5 December 2023, at the accounting breakfast organised in cooperation with the Section of Accountants of Dolenjska and Bela Krajina (SR DBK) at the Chamber of Commerce of Dolenjska and Bela Krajina and the Chamber of Tax Advisors of Slovenia (as part of the ZDSS Open Day), we listened to a lecture given by Dejan Gavrilovski and Sas Sukich from A Tax International d.o.o. The guests presented their approach to the digitalisation of reporting and the various possibilities of automating the preparation of reports, including practical examples. They also addressed the most common challenges in this area and offered solutions that include a clear roadmap, appropriate software, staff expertise, organisational culture and data integrity. The material is available [here](#).

After a substantive discussion with the expert guests, the mission of the Chamber of Tax Advisors of Slovenia (ZDSS) and the Tax and Financial Practice magazine were presented.

The second part of the Accounting Breakfast was a meeting of the Section of Accountants of Dolenjska and Bela Krajina, where the participants discussed opportunities for improving the work of the Section in the future and developed the Section's work programme for 2024.

The event takes place as part of the [SRC-EDIH project](#).
