

## Visit to Krka and meeting of the Executive Committee of the Section for Quality

Section for Quality (SK) is responsible for, among other things, the exchange of business practices between companies. This time, KRKA, d.d., Novo mesto, opened its doors, building trust through its extensive experience, innovative capacity and commitment and responsibility towards the environment. They are committed to quality, innovation and development, and 10% of their sales revenue goes to research and development. When it comes to health, only the best is good enough. They carefully plan the creation of every medicine - designing them from start to finish, from the development of the active ingredient to the implementation of the final product, ensuring quality throughout the entire life cycle. The company's business story, with a focus on quality management, was shared with the audience and presented by Mateja Vrečer, Director of Quality Management and member of the Supervisory Board. This was followed by a short film about Krka and a tour of NOTOL 2.

As part of the meeting, the Section for Quality (SK) also held its last Executive Committee meeting in 2023. The meeting highlighted opportunities to improve the Section's activities in the future and formulated the Section's programme of activities for 2024.

The meeting concluded with a social gathering and exchange of views over a banquet.

The event takes place as part of the [SRC-EDIH project](#).
