

Visit to Krka and meeting of the Executive Committee of the Section for Quality

13 December 2023

From 12.00 to 14.50.

Location: KRKA, d.d., Novo mesto (Šmarješka cesta 6)

We invite members of the Section for Quality ([SK](#)), as well as all others who would like to become members, to visit the company. Membership in the Section is free of charge for all employees of companies that are members of the GZDBK.

Priority for available places is given to members of the SK Executive Committee!

Join the [Section for Quality](#)>>

Section for Quality (QS) is responsible for the exchange of business practices between companies. This time, KRKA, d.d., Novo mesto, is opening its doors to us, a company that creates hope and builds trust through its rich experience, innovative capacity, and commitment and responsibility towards all living beings and the environment. The business story of the company will be shared with those present, with a focus on quality management.

We will visit a company with a wide range of high-quality and affordable products (medicines) that contribute to a higher quality of life and responsibly co-create the world. They state their mission and values as:

"Patient and other user satisfaction is at the forefront of our minds from the development of our products to the day they reach their hands. We are guided by a constant desire for research and high quality at all levels of our operations. With a vertically integrated business model, we create value for all our stakeholders in a responsible and sustainable way. Our values determine how we work together to achieve our vision and guide our business decisions. We are guided by a balanced sustainable development that contributes to the protection of health, the preservation of the natural environment and the development of the social community."

Their strengths are their extensive experience, development-oriented mindset, innovative solutions and generic medicines of superior quality, continuous investment in advanced technologies and extensive in-house manufacturing, registration and marketing and sales network.

They are committed to quality, innovation and development, with 10% of sales revenues dedicated to research and development. When it comes to health, only the best is good enough. That's why they carefully plan the creation of every medicine - designing them from start to finish, from the development of the active ingredient to the execution of the final product, ensuring quality throughout the entire life cycle.

You are cordially invited!
